ITW EAE Electrovert Unveils Aquastorm 160 a Compact Design that Meets Unmatched Cleaning Performance.

Lakeville, Minnesota, March 4, 2025 – Electrovert, a leader in innovative cleaning solutions, proudly announces the launch of the Aquastorm 160 (AS160), an advanced cleaning system designed to deliver superior performance with a compact footprint. Equipped with the superior Hurricane system, the AS160 sets a new standard for precision and efficiency in printed circuit board (PCB) cleaning.

The A160s powerful Intermix nozzles ensure exceptional rinse efficiency for even the most delicate or complex PCB assemblies. Its versatile 24" conveyor width accommodates a wide range of PCB sizes, making it an ideal solution for various manufacturing needs.

One of the key features is the patented Torrid Dryer, which guarantees optimal drying, reducing cycles times and increasing throughput. The integration of Checkmate 4.0 further enhances product control and precision alignment, ensuring consistent and reliable cleaning results.

The cleaners improved chemical isolation significantly reduces chemical consumption, contributing to both cost savings and environmental sustainability. Additionally, the AS160 supports advanced capabilities like datalogging, CFX and Open Apps, enabling seamless tracking, communication and integration with existing factory systems.

"The AS160 represents the next generation of cleaning technology," said Rod Chilton, Cleaner Business Manager. "With its powerful performance, compact design, and environmentally conscious features, it offers our customer unparalleled efficiency and reliability."

ITW EAE, a division of Illinois Tool Works, Inc., is the global leader in process knowledge, services and manufacture of capital equipment used in the printed circuit board assembly and semiconductor industries. The group brings together the world's leading brands of electronics assembly equipment: MPM Printers, Camalot Dispensers, Electrovert Cleaners and Soldering Solutions, Vitronics Soltec Soldering Solutions and Despatch Thermal Processing Technology.
