ITW EAE Celebrates Major Milestone in Domestic Manufacturing Expansion

Lakeville, Minnesota – November 11, 2025 – ITW EAE proudly announces the successful completion of its first USA-built Vitronics Soltec Centurion Reflow Oven, MPM Momentum II Elite and HiE Stencil Printers at its Camdenton, Missouri facility. This achievement marks a significant milestone in ITW EAE's strategic initiative to expand domestic manufacturing capabilities, complementing its established production site in Suzhou, China.

In just a few short months, ITW EAE has ramped up production, utilized their robust supply chain and completed machine builds, demonstrating the agility and expertise of the Camdenton team. With over 75 years of innovation and manufacturing excellence, the facility has once again proven its ability to manage complex production transitions globally.

Customers can expect the same high standards of technical precision, quality assurance, and machine capability testing across both production sites, ensuring consistent performance regardless of origin.

Looking ahead, ITW EAE will expand Centurion model options through the first half of 2026, including 12- and 17-zone configurations, offering greater flexibility for advanced PCB manufacturing.

"This milestone is a testament to our team's dedication and the strength of our strategic vision," said Greg Calvo, Product Manager. "We're proud to deliver world-class solutions from our U.S. facility and continue supporting our customers with reliable, innovative equipment tailored to their evolving needs."

ITW EAE, a division of Illinois Tool Works, Inc., is the global leader in process knowledge, services and manufacture of capital equipment used in the printed circuit board assembly and semiconductor industries. The group brings together the world's leading brands of electronics assembly equipment: MPM Printers, Camalot Dispensers, Electrovert Cleaners and Soldering Solutions, Vitronics Soltec Soldering Solutions and Despatch Thermal Processing Technology.
